

THE OFFER

The 60-Day Proof

Sixty days, read-only, free, on your live ledger. An AI agent makes the posting decision on every supplier invoice you receive, and shows you its reasoning before you pay a penny.

What happens

For 60 days, Invoice Maestro runs read-only against your live accounts payable inbox and your accounting system. It reads, matches, codes, and makes the posting decision on every supplier invoice.

You see every decision it would have made, with its reasoning and confidence score, from the first week. Where a decision needs a person, it says so and escalates. Every decision is written to a tamper-evident, append-only audit trail.

What it costs

Nothing for 60 days. No commitment, no card details, no integration risk: read-only access means the agent cannot write to your systems.

Setup needs one thing from you: read-only access, arranged with your IT on a single call. Your team changes nothing about how they work while the evidence builds.

Day 61

If the evidence convinces you, the agent goes live on a rolling monthly contract, with no onboarding fee. No long contract: if it ever stops earning its place, you stop paying.

If it does not, you walk away with the AP Decision Report: a free, detailed picture of your AP process, coding patterns and exception causes. No hard feelings, no follow-up sequence.

1

Day 1

One call with your IT. Read-only access. Nothing changes for your team.

1-8

Weeks 1 to 8

Every invoice decided and recorded. Weekly decision reviews with a named person from Mandate.

60

Day 60

The AP Decision Report, built from your own data. Yours to keep either way.

61

Day 61

Live on a rolling monthly contract, or we stop. Your call, on your evidence.

Sixty days is deliberately long

It spans two month-ends and a full cycle of every monthly supplier statement, so the evidence covers the hard cases. The decision rests on your evidence, not our claims.

We only run three at a time

Each Proof receives founder-level attention through setup and weekly decision reviews, so we run a maximum of three concurrently.

Take a slot

Email or call me, and I will set up your read-only access in the same week.
